

Medicines and First Aid Policy

November 2017

Signed (Chair of Governing Body):	
Date:	November 2017
Review:	November 2018

The Arbor Academy Trust reviews this policy annually. The Trustees may, however, review the policy earlier than this, if the Government introduces new regulations, or if the Trust receives recommendations on how the policy might be improved.

This document is also available in other formats e.g. e-mail and enlarged print version, on request to the School Offices and is displayed on the schools' websites.

Rationale

- We believe it is essential to have in place adequate first aid provision and medical care for all pupils and Trust personnel.
- Some medical conditions cannot be adequately controlled without treatment during school hours. In many cases, without this treatment, a child's education may be adversely affected. We would wish to assist pupils, within reason, to obtain this treatment.

Aims

- To provide adequate first aid provision and medical care for pupils and Trust personnel.
- To have in place qualified first aid personnel.
- To have in place adequate first aid equipment.
- To have in place excellent lines of communication with the emergency services and other external agencies.

Strategy

a. Identification and Awareness

Parents must inform the school of their child's medical history that may be a cause for concern. Staff must report any concerns they have on the medical welfare of any pupil to the Executive Principal or Heads of Schools.

b. Training

Regular First Aid Courses are organised by the Trust and **all** members of staff are actively encouraged to undertake the training to achieve a recognised First Aid Qualification.

All staff will be made aware of medical problems in pupils. Pupils with severe allergies or conditions will be displayed in the staffroom to ensure all staff are aware of who they are and what needs to be done in the event of an emergency.

House Keeping

All medicines must be securely stored and labelled in the Office.

Records

Records are to be kept for all accidents for pupils and staff.

Reporting

Parents are to be informed of all accidents especially head injuries.

Administration of Medicines

- Administration of medicines is at the discretion of the Executive Principal and only with the agreement of staff concerned.
- Staff may only help with the administration of medicines which can be taken orally. A written request to administer medicines must be obtained from the parent but this will not automatically be agreed to. Each case will be considered in isolation.
- Only medicines prescribed by a Doctor can be administered. Medicines from any other source will not be given.

- A record of all drugs administered at school will be kept on file. Medicines will be stored in a safe place when not in use, i.e. in the medical room, with the exception of asthma inhalers. With the parent's permission, children's inhalers may be kept on their person or in their school tray.
- Members of staff should ensure that medicines held on behalf of a child are 'in date'. If medicines become 'out of date' parents will be notified and the medicines returned to them.
- The school management and staff will act in accordance with the health and safety guidelines issued by the LA. This approach will also ensure that Heads of Schools, Governors and staff remain within the protection of the LA's insurance policies.

First Aid Procedure

- Administration of first aid within the Trust should, wherever possible be carried out by one of our first aiders (See appendix 1).

First Aid Equipment

- First aid boxes are housed in the Office. Staff are requested to report any depletion in stock to designated person (see Appendix 2) who is responsible for replenishing the boxes and for conducting a check of contents.
- A first aid belt must be taken out onto the playground during break times by Teachers, Learning Support Staff and Midday Supervisors and the returned to the first aid station.
- A first aid belt must be taken on all school trips by the nominated First Aider for the group. If the trip has a first aider provided it is not necessary for another to accompany the trip but the belt should still be taken by the trip Leader.

Protection Aids

- Disposable gloves must be worn when dealing with all injuries which involve the loss of blood.
- Sterile wipes and mouth guards should be used for any mouth to mouth situations. The appropriate disposal of cleaning and treatment resources is to be ensured at all times.

Specialised Equipment

Additional training and guidance will be needed for staff on the use of EPIPENS, breathing apparatus etc when relevant and on request by parents. This is undertaken voluntarily by staff and organised by the Executive Principal when the need presents.

We believe the above strategy is effective in the provision of medical and first aid care within the schools.

Appendix 1

School	Name Member of Staff	Work Base Position Held	When on duty
Davies Lane	Margaret Skeete	Welfare officer	
	Mandy Auld	Top & Middle Floors	
	Jackie Tatham	South site
